1. The following is an examiner's statement of reasons for allowance: the prior art fails to anticipate or render obvious the combination of a fastening arrangement between a riding ring and a casing as set forth in claims 11, 14, 17 and 24, and most significantly requires in claim 11, the support elements affixed to the rotary cylinder casing have spring guides oriented axially relative to the rotary cylinder, between each of which is positioned a clamping element tensioned in a force-fit manner on the riding ring; and claims 14 and 24 also require, the riding ring having two concentric annular grooves formed in a lateral face thereof and the screw jaws of the clamping elements are formed as grippers, with one of two gripping jaws of each screw jaw engaging in each of the two concentric grooves; claim 17 further requires, the clamping screw tensioning the screw jaw with the riding ring in a force-fit manner.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
